ANTIMICROBIAL OXAZOLIDINE/IODOPROPYNYL-BUTYL
CARBAMATE COMPOSITION CONTAINING LESS
THAN 0.1 wt% FREE FORMALDEHYDE

ABSTRACT

This invention relates to a broad spectrum antimicrobial composition, effective against gram negative and gram positive bacteria and fungi, which comprises a synergistic composition comprising iodopropynyl butyl carbamate and a bicyclic hydroxymethyl oxazolidine containing less than 0.1 % of free formaldehyde.
